- Design and Maintenance/Fencing Requirements/Pool Markings
- Water Chemistry and Safety Equipment/Signage
- Public Interactive Water Features
- Rules and Regulations – District Order 2024-1

The NET Health District Order 2024-1 provides for the inspection and permitting of public swimming pools and spas in Smith County and the City of Bullard. Training is a critical part of the process. The owner of a public swimming pool, spa or Public Interactive Water Feature must have a Certified Pool Operator overseeing the maintenance needs of the pool. If the CPO is not on property, one person on staff responsible for the facility needs to attend an annual training provided by or approved by the NET Health. The training will include an overview of the design and maintenance of public swimming pools and spas, operation requirements for water chemistry and documentation, signage requirements, fencing requirements, safety issues to include entrapment hazards and equipment, as well as the state and local regulations for public swimming pools and spas.

Upon completion of the training a certificate will be issued to the participant. Additional training courses will be provided as needed with at least three per year presented. An individual may also receive a certificate by attending a training course approved by the NET Health. Upon presenting the credentials of the course, the individual may register in the system for FREE. A registry will be maintained by the NET Health. Thank you for your commitment to public health.
